

# Testing the Axis Bank Login Page

## Objective

This project aims to validate the login functionality of the Axis Bank Internet Banking page. It involves testing the complete login process to ensure it is secure, user-friendly, and efficient. The project will focus on both successful and unsuccessful login attempts, input validations, and error message handling, providing a comprehensive assessment of the login feature. The goal is to confirm that users can access their accounts securely while minimizing the risk of errors during the login process.

## Scope

This project will focus exclusively on the login functionality of the Axis Bank Internet Banking page. Key aspects Accessing the login page of the Axis Bank website.

- Input validation for username and password fields.

- Verifying correct error messages for invalid inputs.

- Ensuring security measures such as password masking and error logging.

## Project Deliverables

**Detailed Test Cases:** Document test cases with clear steps and expected outcomes for various login scenarios.

## Roles and Responsibilities

**Ambala Rakesh** Project Lead - Oversees project progress and ensures the completion of all testing phases like Dashboard and Services

**Mansi Santosh Mahale:** Writing Test Cases in Axis bank login page for directly to Accounts and Loans

**Shubhadip Paul:** Writing Test Cases in Axis bank login page for directly to Term Deposits and Credit Cards

**Bhabani Sankar Khadiratna:** Writing Test Cases in Axis bank login page for directly to Payments and Insurance

**Middela Sathvika:** Writing Test Cases in Axis bank login page for directly to Investments

## Tools and Resources

**Test Management Tools:** Excel for managing test cases and defects.

**Documentation:** Word or Excel for documenting test cases results.

**Browser:** Chrome or Firefox for testing the login functionality.

## Success Criteria

- All test cases are executed and documented.

- Any issues found are resolved or deferred with proper justification.

- The login functionality meets user expectations without major issues.

## Test Closure Report

### Objective

To close the testing phase for the Axis Bank login page functionality and confirm that all requirements have been met.
